

BEL-TS Fast Connect

BELUK

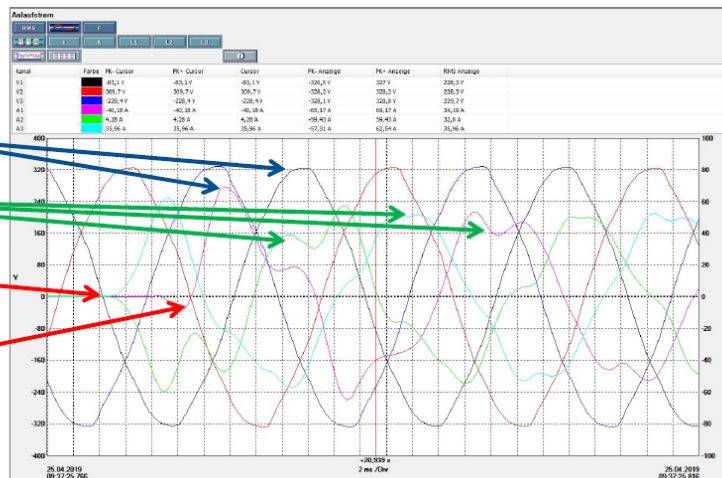

Advantages:

- Tool free connection 4 mm²- 25mm²
- 70 % time saving compared to standard connection
- No incorrect torques
- No loosening of the connections due to vibration or heating

Fast and smooth switching:

Switch-ON of a 25 kvar 3-phase capacitor by an BEL-TS thyristor switch:

- No Voltage or current spikes
- Double peak due to Harmonics (3rd)
- Switching on of A2, A3
- Switching on of A1 (6,6 ms later)

The BEL-TS Beluk thyristor controller is characterized by fast and low-reaction switching behavior.

All Beluk thyristor controllers BEL-TS:

- designed for continuous operation
- extremely reliable and durable
- Internally protected against thermal damage
- developed and built in Germany

Beluk thyristor controller BEL-TS Fast Connect:

- Fast and secure connection
- Maintenance-free connection

Available types:

- BEL-TS25H2FC (25kVAr/400V)
- BEL-TS50H2FC (50kVar/400V)
