Configuration Tool

BELUK

- You need to check or change parameters for existing compensations?
- You are not sure if the parameter settings are suitable for your application?
- You build compensation panel and have to change a parameter in many systems?
- Create configuration(s) comfortably and clearly on the computer
- Reduce time effort during commissioning and documentation
- You can switch to your laptop via Teamviewer or similar and share / discuss the system values with others.

Configuration Tool

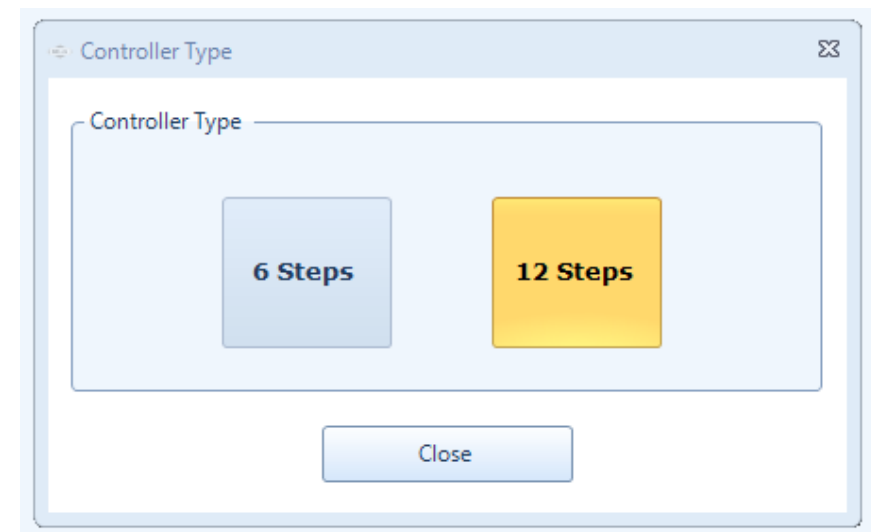

BELUK

How it works:

You need our CX Plus Regler with Modbus application

You select

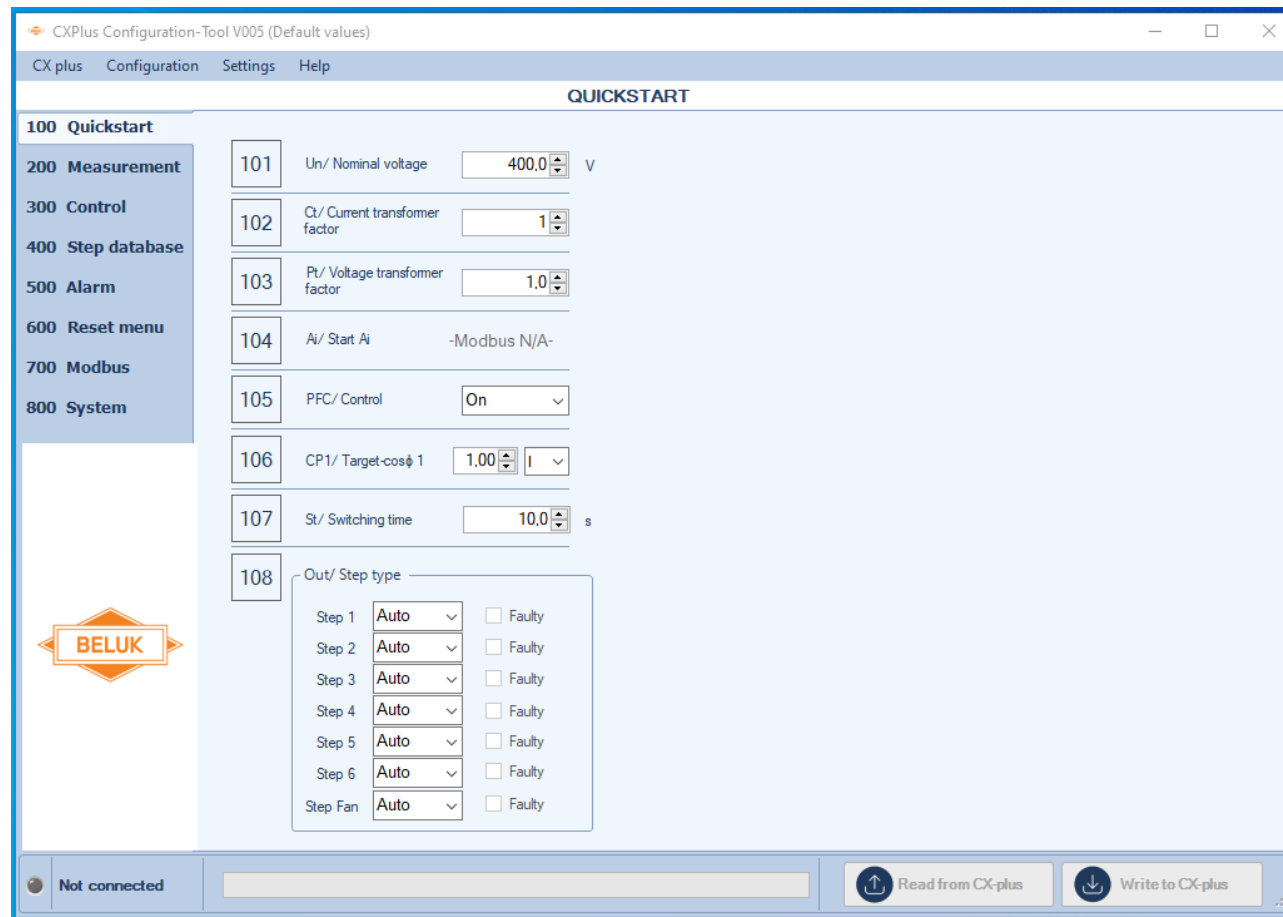

- User level (Expert / Advanced / Limited)
- Controller Typ (currently CX Plus 6 or 12)

Configuration Tool

BELUK

The menu is designed like the CX Plus

- Quickly and conveniently prepare, change and read out data
- Time saving by retrieving the configured data
- Quick and easy commissioning
- Visualize parameters
- Reading the system data (e.g. step size)
- Predictive Maintenance
- Support with troubleshooting
- Read out existing data
- Load default parameters
- Configure parameter settings
- store data
